## C E R T I F I C A T E

TO WHOM SO EVER IT MAY CONCERN

This is to certify that **Mr. Murtaza Bilwaniwala** student of **B.Tech. Semester VI (Computer Engineering)** has completed his full semester on site project work titled “**Workshop Portal**” satisfactorily in partial fulfillment of the requirement of Bachelor of Technology degree of Computer Engineering of Ganpat University, Kherva, Mehsana in the year 2021-2022.

**Dr. Paresh M. Solanki**  
Head, Computer Engineering

## ACKNOWLEDGEMENT

This satisfaction that successful completion of any task would be incomplete without the mention of people whose ceaseless cooperation it made it possible, whose constant guidance and encouragement crown all efforts with success. We are grateful to our guide **Prof. Ritesh Upadhyay** for the guidance, inspiration and constructive suggestions that helped us in the preparation of this project. We also thank our colleagues who have helped in successful completion of the project.

# **1. Introduction**

## **1.1 Problem Statement :**

In today's hectic schedule of students and teachers, it's really hard for them to survey about the Workshop/Seminars in their areas of interest and get its detailed information.

## **1.2 Objective :**

To create a complete user friendly Web Application not only for the students but for the faculty as well to keep updated and track of the workshop events going on or going to be in the college.

Students/Faculty who want to be involved with a specific event in their area of interest can enroll through the app as well as get the detailed information about the event such as its date, time, venue, description and information about tickets if any.

## **1.3 Workflow :**

Register > Login > Home Page > My Profile > Logout

## **1.4 Benefits :**

Helps Students/Faculty to keep tabs on current or upcoming events and what they've achieved so far with the same.

Easy Accessibility and a move towards Paperless system.

Student/Faculty can find others with the same interests and interact with them.

## **1.5 Existing Application :**

None for our College.

## **1.6 Project Duration :**

1 Year.

## **1.7 Future Enhancements :**

Planning to build the Application limited to our college at the moment but might upgrade the Application as a generalized version which can be used by anyone from any college.

## **2. Feasibility Study**

### **2.1 Study of Current System :**

Suppose we want to organize an event in college we need to create posters, banners and make an announcement in classes so that students participate but if any student got absent on that day, then he will remain unnotified. We have to constantly keep in touch with the respective faculty/student for the updates and the whole process is time consuming.

### **2.2 Requirements of New System :**

None such current online system exists.

**Whenever a new system (a hardware or software) is to be introduced, there is a need to study the new system in every aspect or manner before working on it. We get the idea whether the project is adequate or not. This is where Feasibility study comes in. The three key considerations are involved in the feasibility analysis are as under :**

### **2.3 Technical Feasibility :**

**It refers to technical knowhow.**

Existing technology supports the system completely.

### **2.4 Operational Feasibility :**

**It means is it possible to practically implement the project. While installing this software, the hardware and software requirements should be specified.**

Our system will be easy to install and use. Hence our system is operationally feasible.

## **2.5 Economical Feasibility :**

**It refers to financial support required. It refers to finance incurred during the development of the project.**

Economical Feasibility is mainly concerned with the cost incurred in the implementation of the software. Since this project is developed using ASP.NET with C# and SQL Server which is most commonly available and even the cost involved in the installation process is not high. Hence this project has good economical feasibility.

## **2.6**

**Hardware Requirements :** Processor : Intel Pentium 4 or More  
: RAM : 1 GB or More  
: Internet Connectivity is a must for this purpose.  
: Basic Peripherals

**Software Requirements :** Microsoft .Net Framework 3.5  
: Microsoft Visual Studio 2008  
: Microsoft ASP.Net 3.5  
: Microsoft C# .Net Language  
: Microsoft SQL Server 2005

### 3. System Requirements Study

#### 3.1 Functional Requirements :

These are the requirements that the end user specifically demands as basic facilities that the system should offer. All these functionalities need to be necessarily incorporated into the system as a part of the contract. These are represented or stated in the form of input to be given to the system, the operation performed and the output expected. They are basically the requirements stated by the user which one can see directly in the final product, unlike the non-functional requirements.

**Examples :** Register & Login.

- : Verification Email is sent when the user registers for the first time.
- : Get notified on the emails the user selected to be alerted on.
- : Follow events of your interests.

#### 3.2 Non-functional Requirements :

These are basically the quality constraints that the system must satisfy according to the project contract. The priority or extent to which these factors are implemented varies from one project to other. They are also called non-behavioural requirements.

They basically deal with issues like :

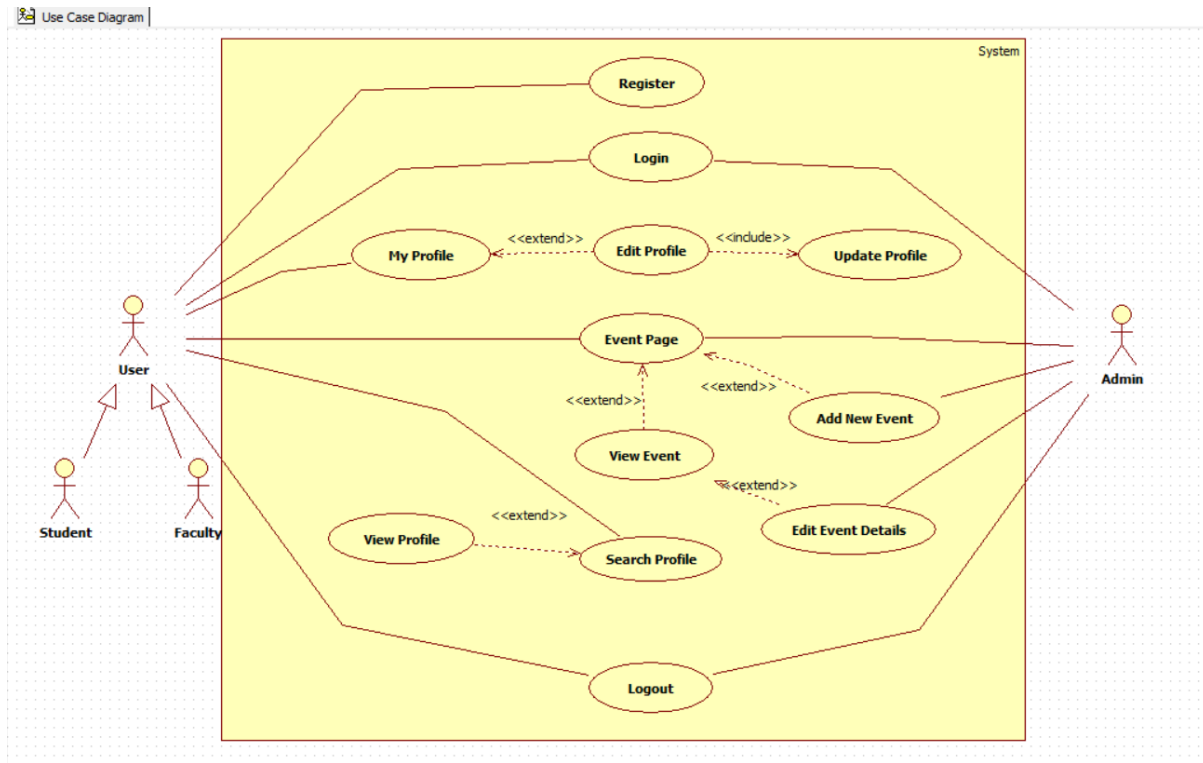

- : Portability
- : Security
- : Maintainability
- : Reliability
- : Scalability
- : Performance
- : Reusability

**Examples :** Each user must use different Emails.

- : Password should contain Alphabets as well as Numbers.

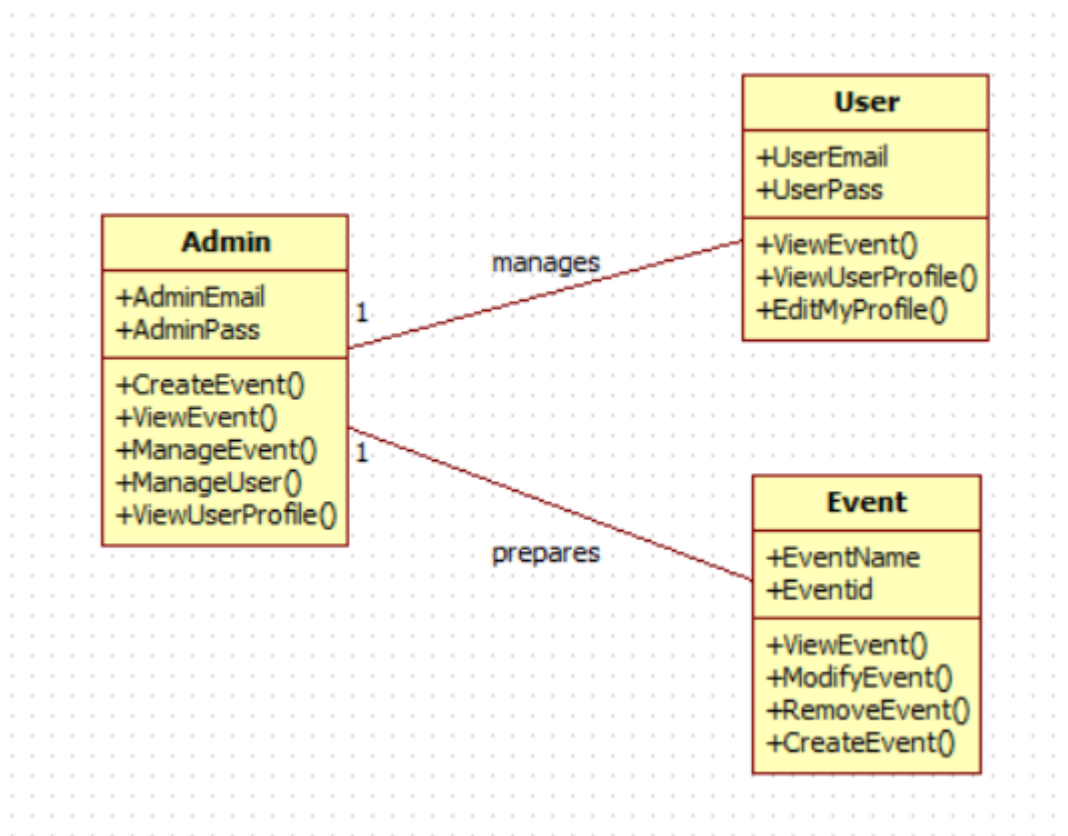

## 4. System Design

### 4.1 Use Case Diagram :

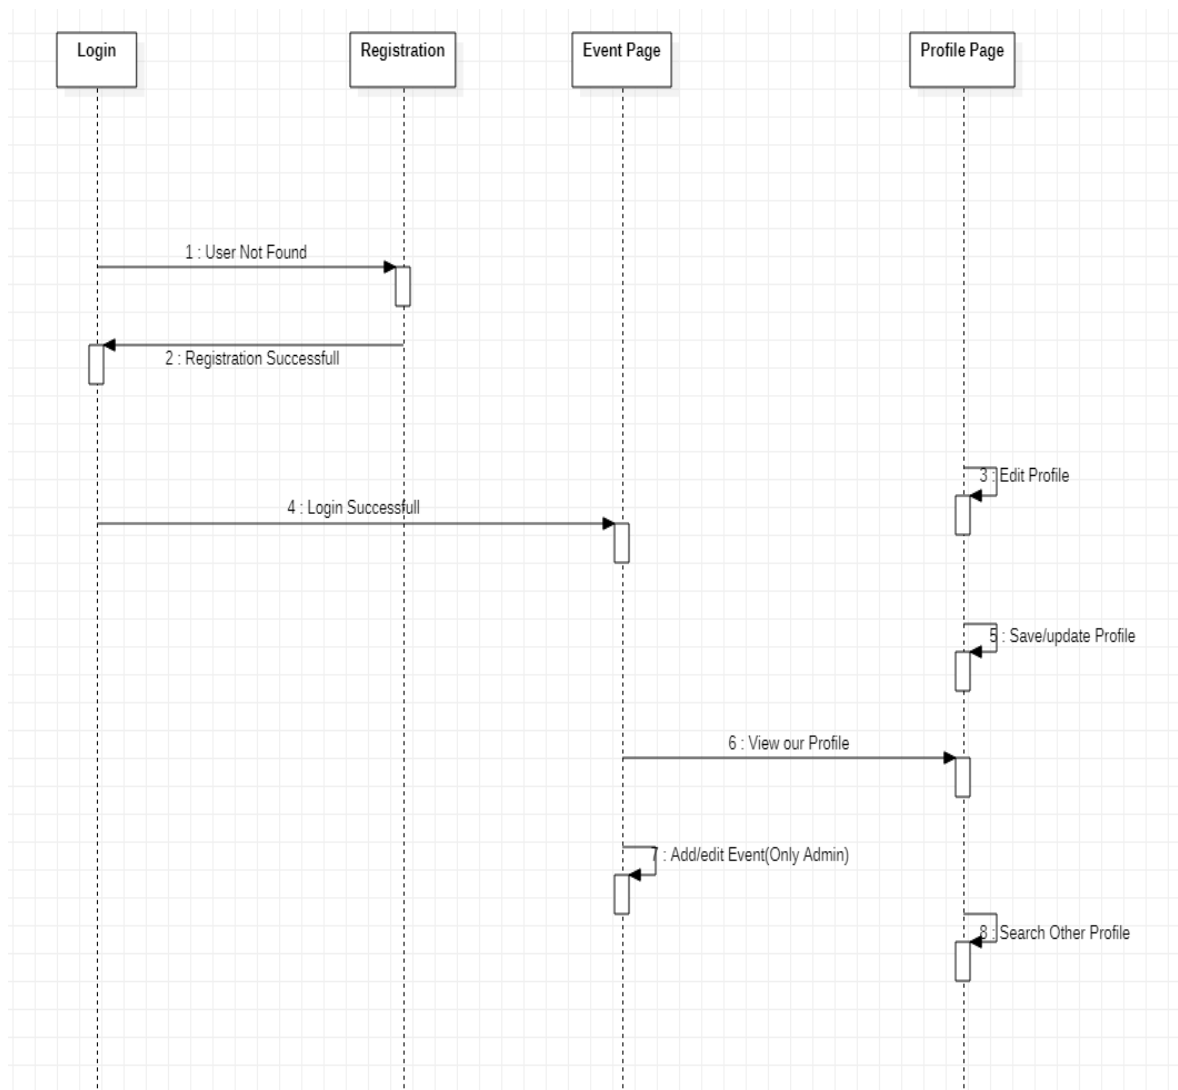

(Figure 4.1)

## 4.2 Class Diagram :

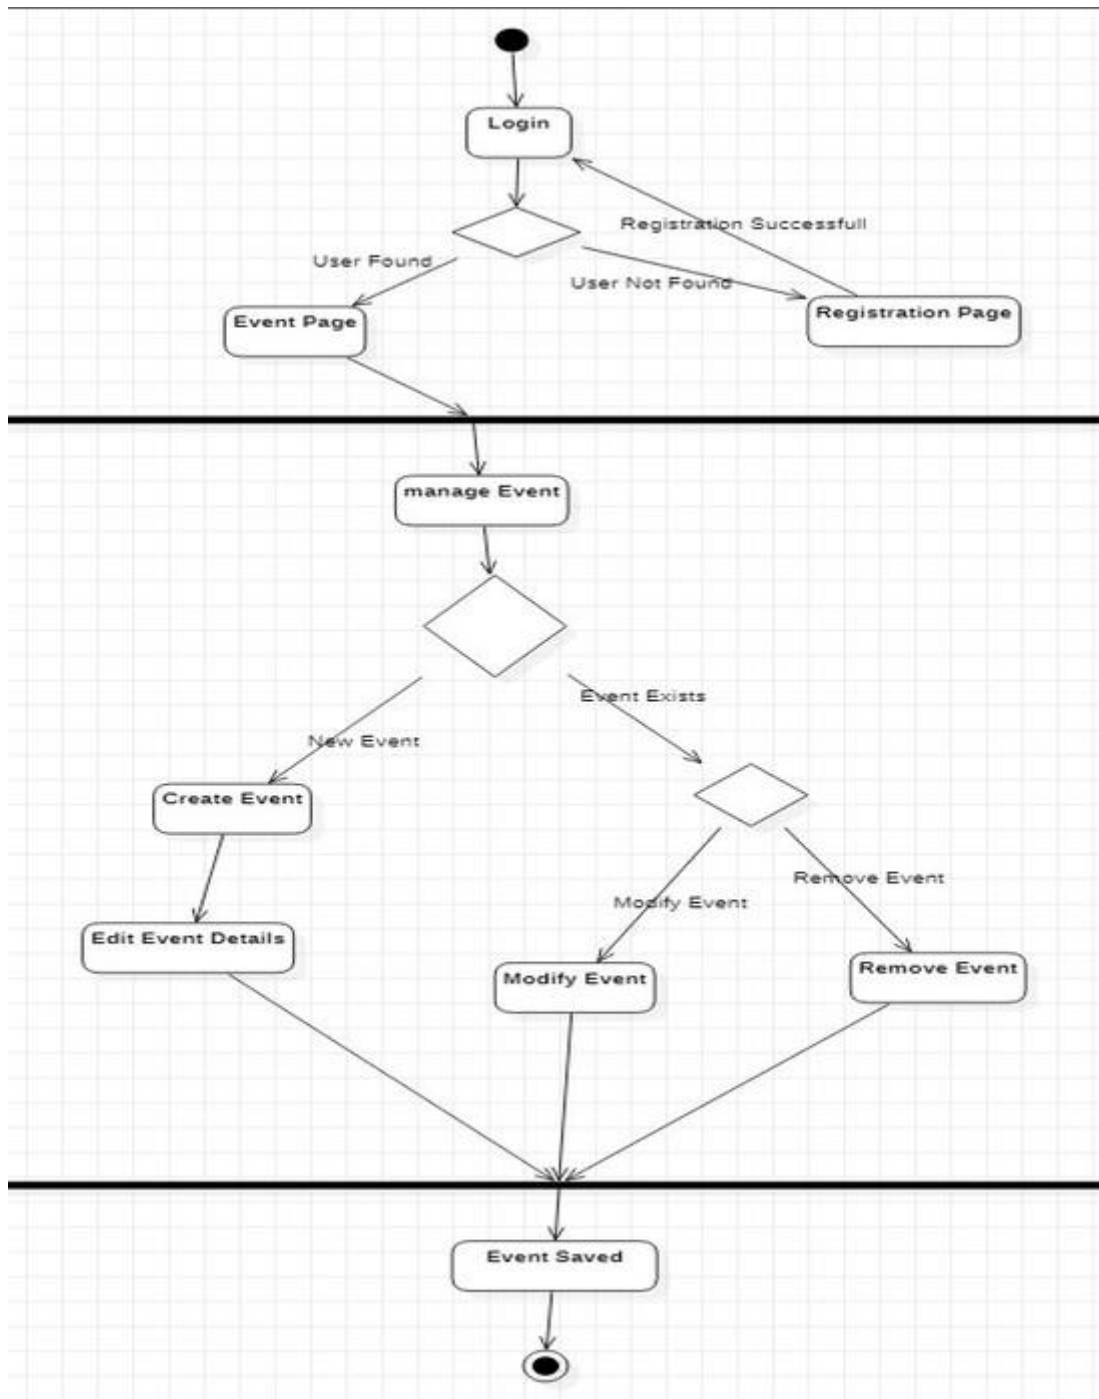

(Figure 4.2)

### 4.3 Sequence Diagram :

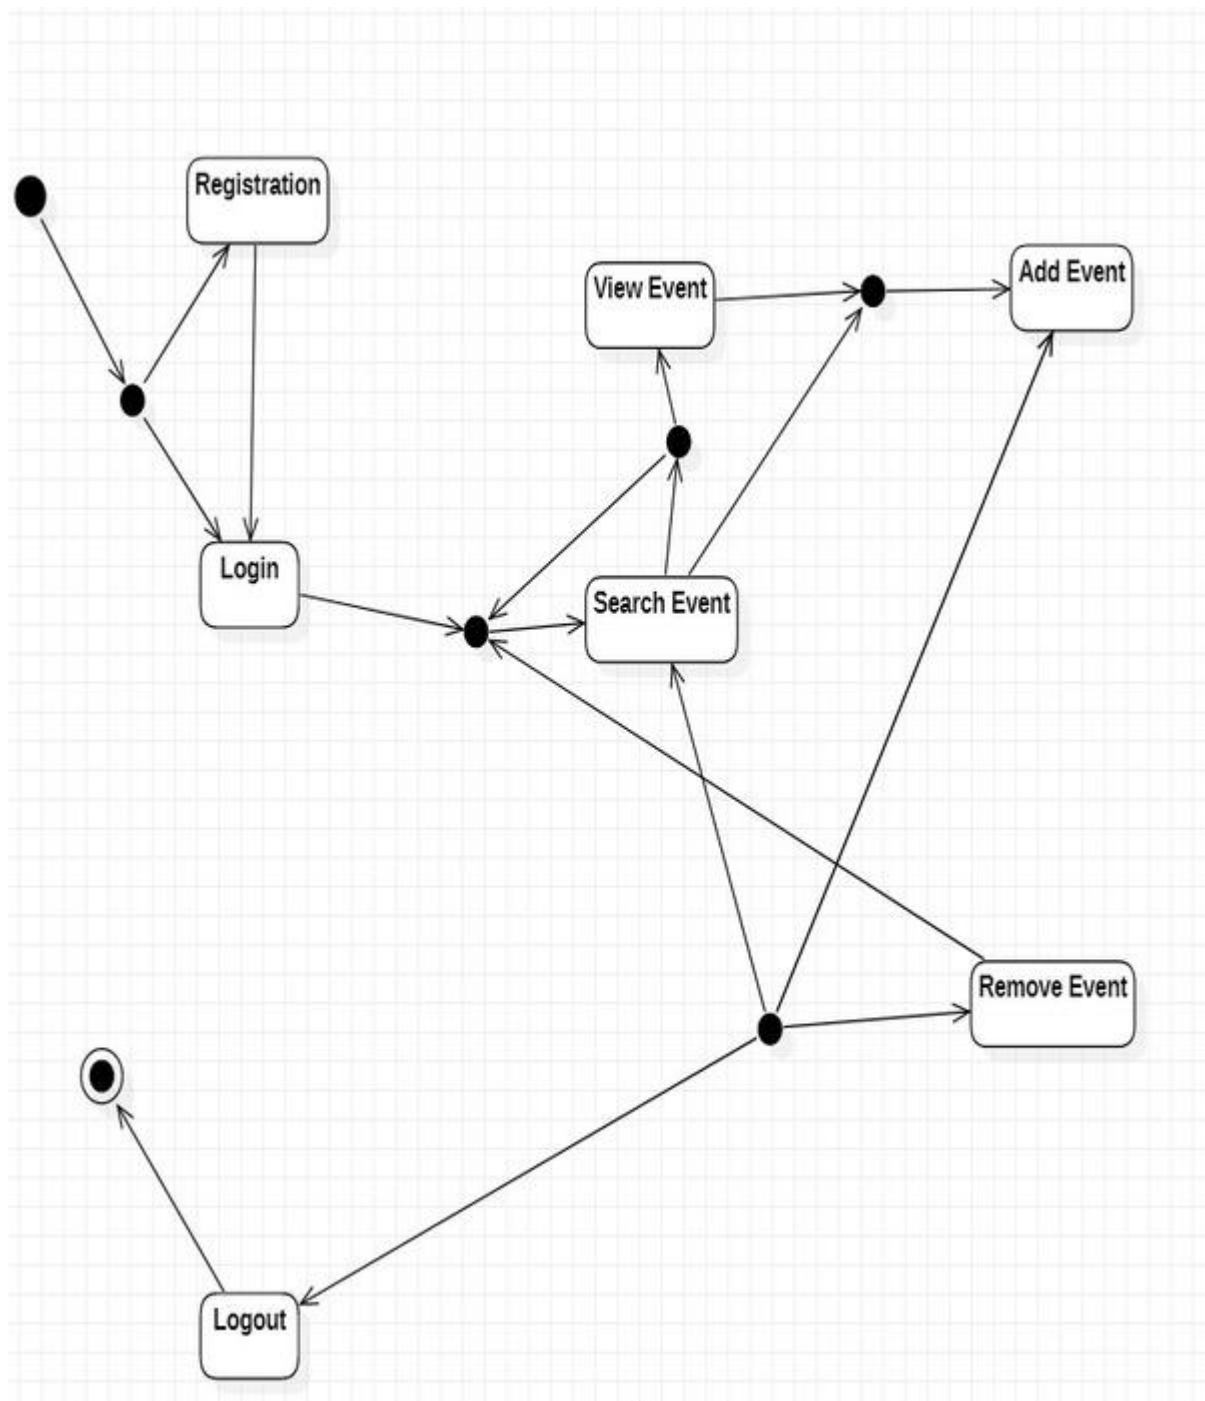

(Figure 4.3)

#### 4.4 Activity Diagram :

(Figure 4.4)

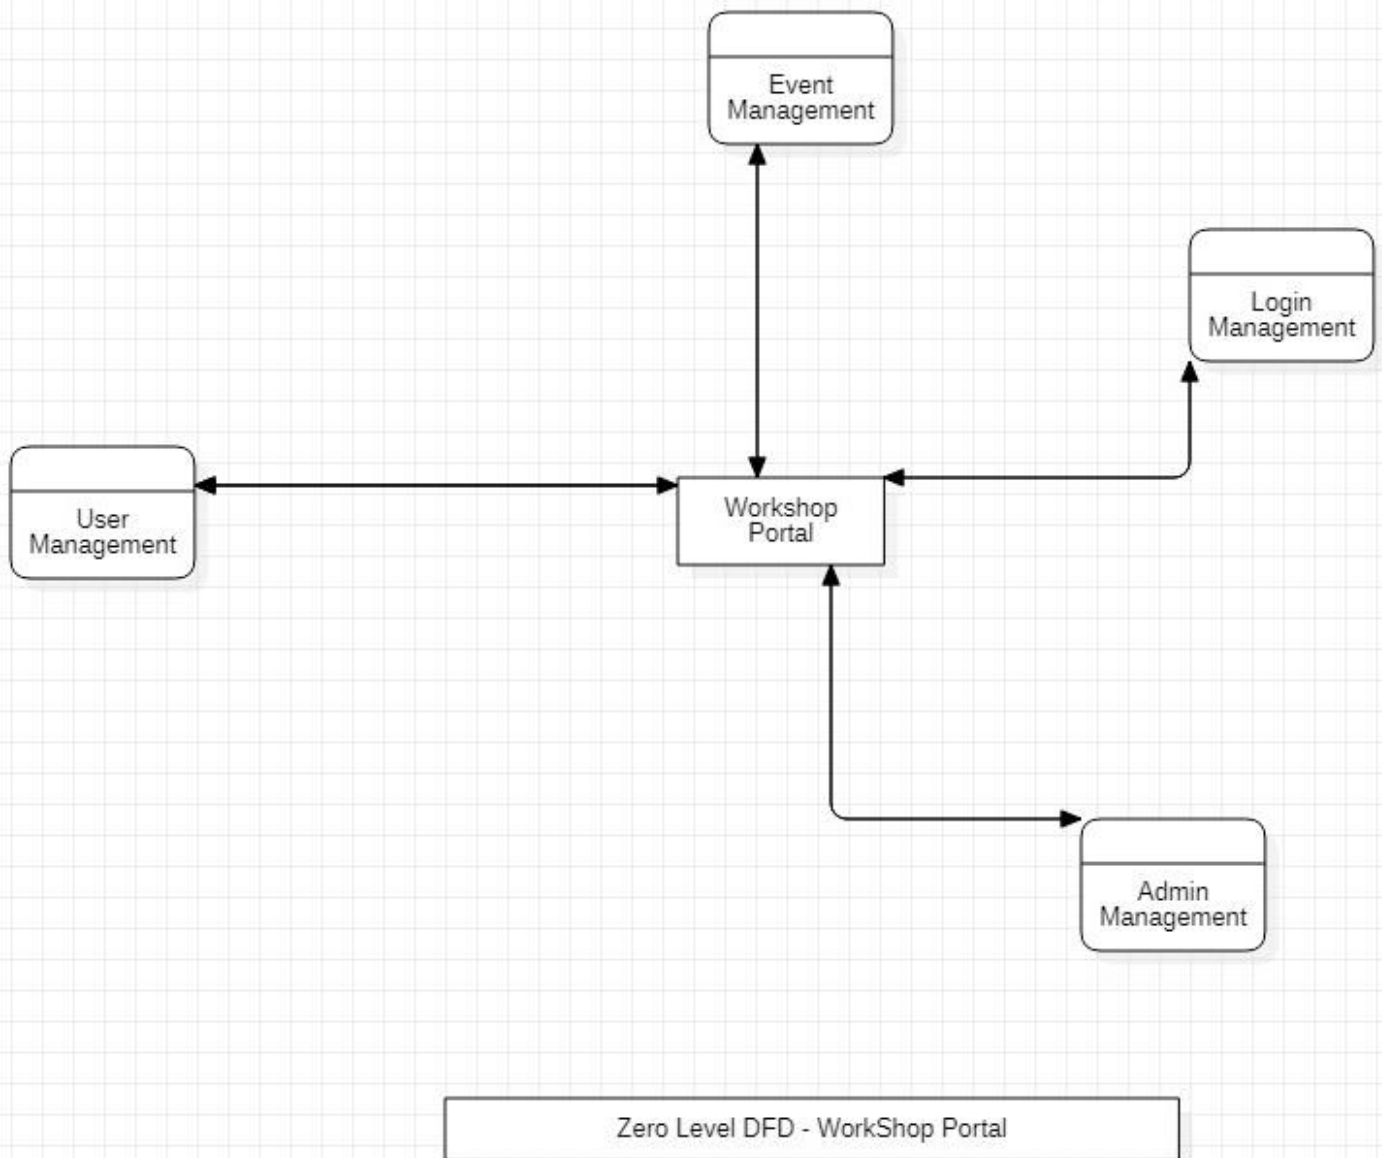

#### 4.5 State Diagram :

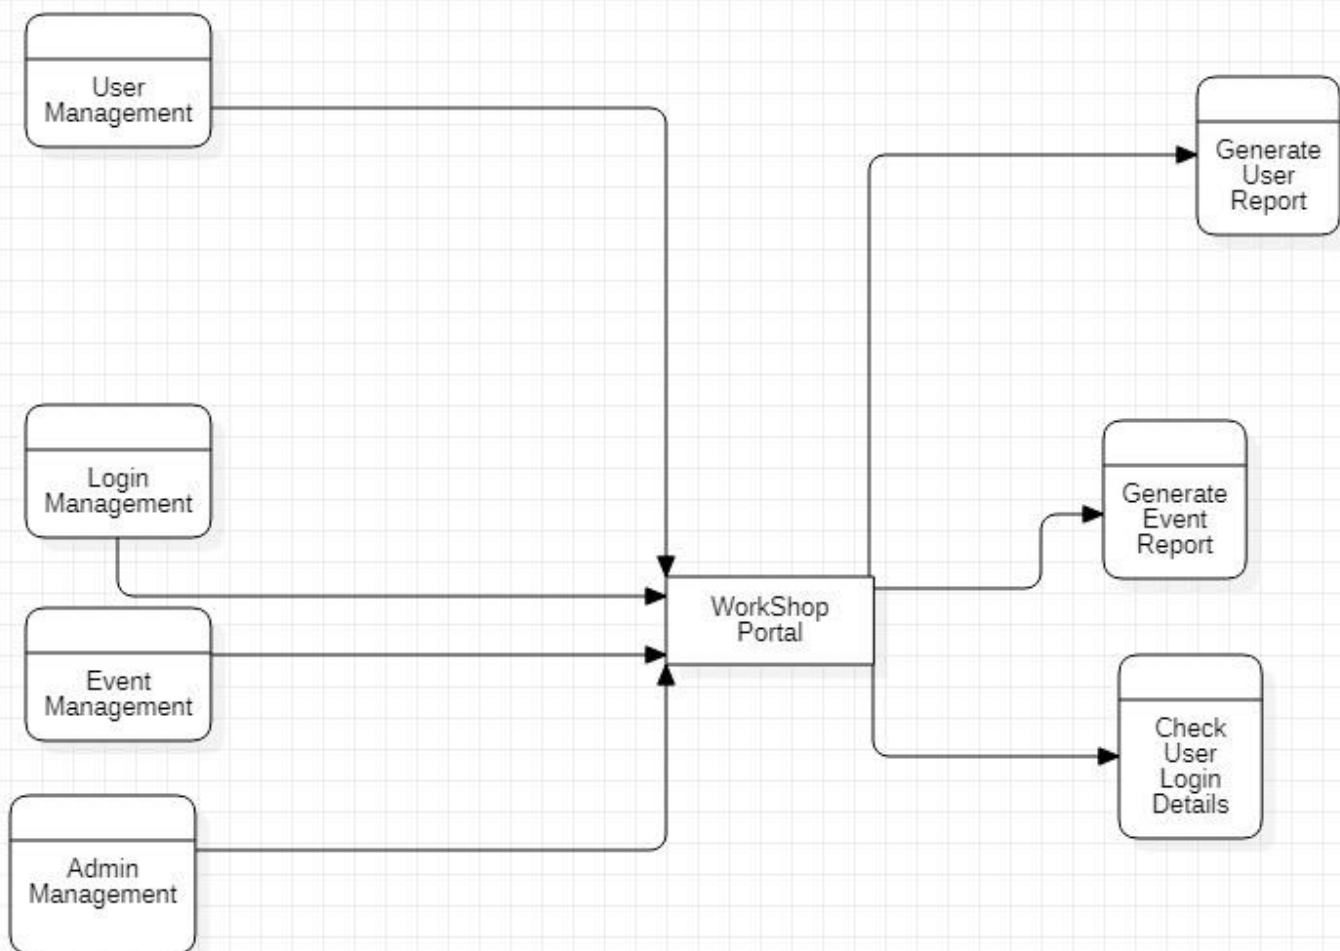

(Figure 4.5)

#### 4.6 Data Flow Diagram :

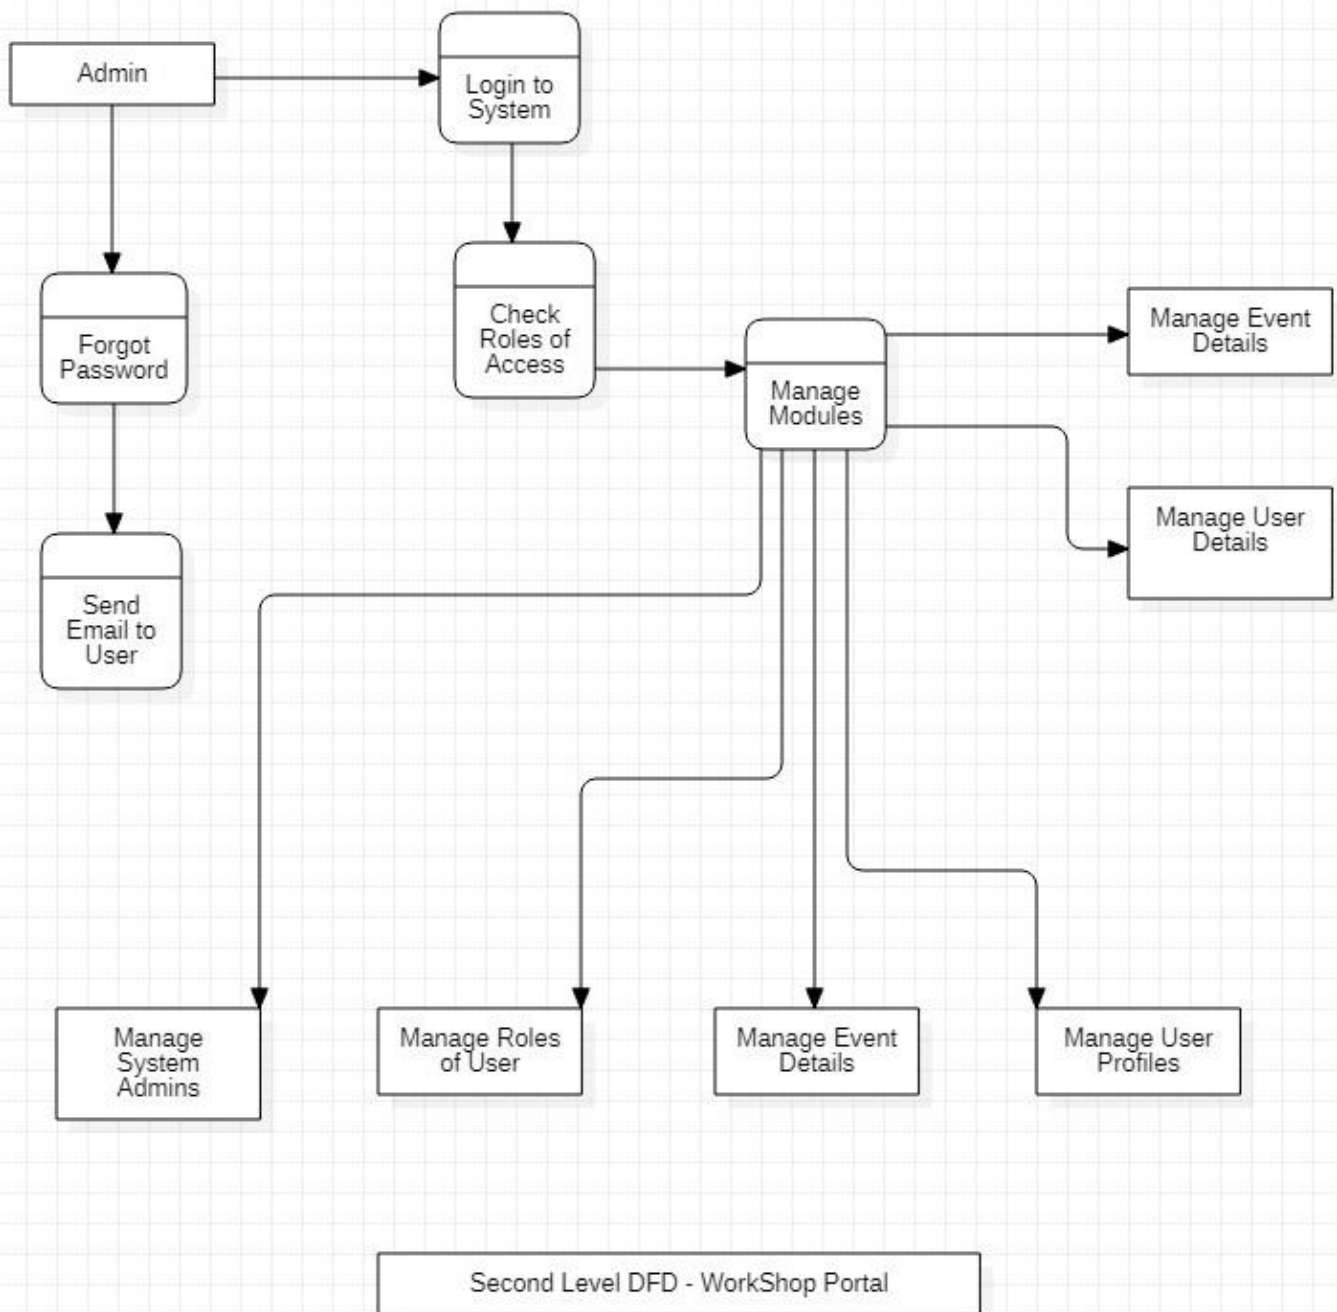

**Zero Level DFD** ([Figure 4.6](#))

First Level DFD - WorkShop Portal

**First Level DFD** ([Figure 4.7](#))

Second Level DFD ([Figure 4.8](#))

## 5. Data Dictionary :

### 5.1 Admin Login Table :

Field Name	Data Type	Constraint	Description
User Name	Varchar (255)	Not Null	Username for Login Procedure
Password	Varchar (255)	Not Null	Password for Login Procedure

[\(Table 5.1\)](#)

### 5.5 Event Table :

Field Name	Data Type	Constraint	Description
Event_ID	Int (11)	Not Null	Event ID Number
Event_Title	Varchar (255)	Not Null	Title of the Event
Event_Description	Varchar (255)	Not Null	Description of the Event
Event_StartDate	Varchar (255)	Not Null	Starting Date of the Event
Event_EndDate	Varchar (255)	Not Null	Ending Date of the Event
Event_Cost	Int (11)	Not Null	Cost if any of the Event
Event_LocationID	Int (11)	Not Null	Location of the Event

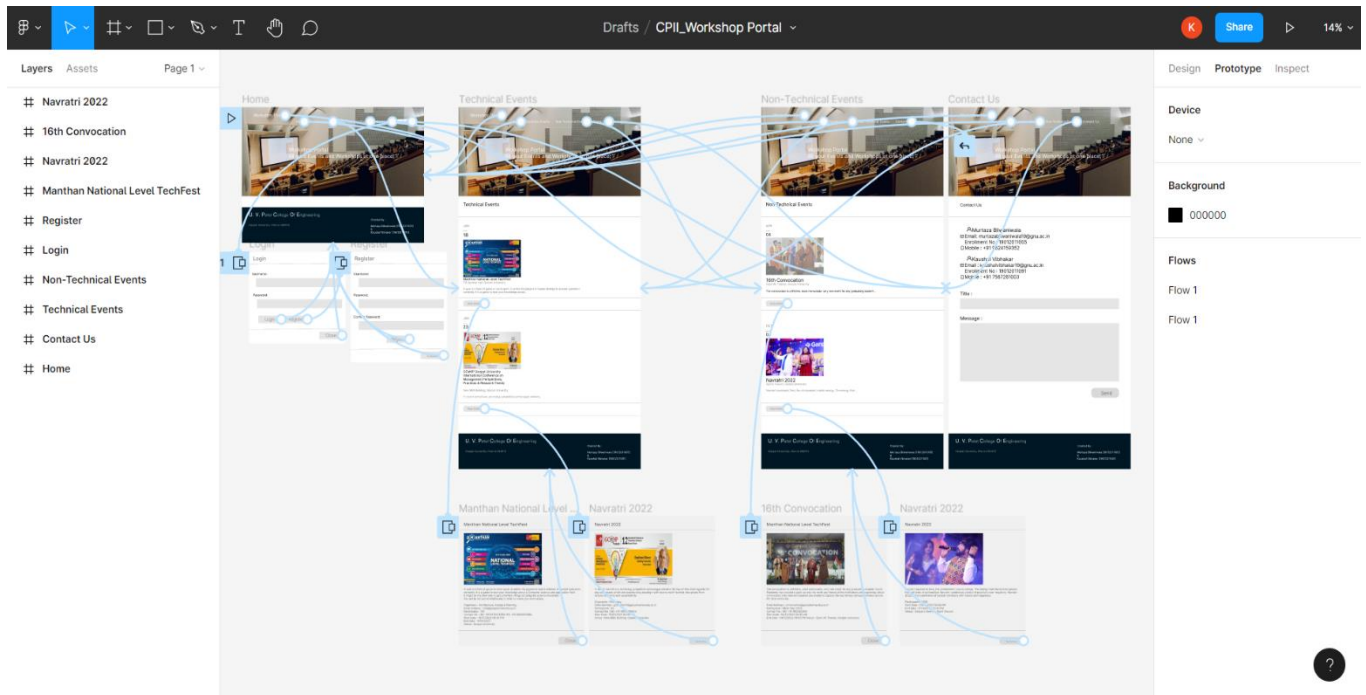

[\(Table 5.2\)](#)

### 5.5 Location Table :

Field Name	Data Type	Constraint	Description
LocationID	Int (11)	Not Null	Location ID Number
Name	Varchar (255)	Not Null	Name of the Location
Address	Varchar (255)	Not Null	Address of the Location
MaxCapacity	Varchar (255)	Not Null	Maximum Capacity of the Location

[\(Table 5.3\)](#)

## 6. Prototype :

## 7. Implementation :

### 7.1 Coding :

16th Convocation

The convocation is a lifetime, most memorable, very rare event for any graduating student. Covid Pandemic has created a panic across the world and hence all the Institutions are organizing virtual convocation only wherein students are unable to capture the last minute campus moments as the life time memories.

Email Address : convocation@ganpatuniversity.ac.in  
Participants : More than 2500

## **8. Conclusion :**

The project entitled as “Workshop Portal” is the system that deals with the issues related to a particular institution about the workshop & such events.

This project will be successfully implemented with all the features mentioned in system requirements specification.

The application provides appropriate information to users according to the chosen service.

The project is designed keeping in view the day to day problems faced by a college.

Deployment of our application will certainly help the college to reduce unnecessary wastage of time in personally going to each department for some information.

Awareness and right information about any event in any college is essential for both the development of student as well as faculty. So this serves the right purpose in achieving the desired requirements of both the communities.
